Foreword

This standard was proposed by and under jurisdiction of the National Technical Committee on Optics & Optic Instruments of Standardization Administration of China (SAC/TC103/SC1).

The drafting organization of this standard is State Food and Drug Administration Hangzhou Centre for Medical Devices Quality Supervision and Testing.

The chief drafting staffs of this standard include Yan Qinglai, Jia Xiaohang, Ma Jun and Zhang Qinyuan.

Medical endoscopes — Fibre optical cables for lighting

1 Scope

This standard specifies the scope, terms and definitions, requirements, and test methods for the fibre optical cables for lighting of the medical endoscopes.

This standard applies to common fibre optical cables for lighting, which may be used as independent products, used for examination and operation with medical endoscopes.

NOTE The common fibre optical cables mean those other than for the special purposes of application.

2 Normative references

The following standards contain provisions which, through reference in this standard, constitute provisions of this standard. For dated references, subsequent amendments to, or revisions of, any of these publications, not including contents of corrigendum, do not apply. However, all the parties to the agreement reached as per this standard are encouraged to research whether the latest edition of these documents may be available. For undated references, the latest edition of the normative document referred to applies.

GB 9706.1 – 2007 Medical electrical equipment — Part 1: General requirements for safety (idt IEC 60601-1: 1988 + A1: 1991 + A2: 1995)

3 Terms and definitions

For the purposes of this standard, the following terms and definitions apply.

3.1

light input surface

the effective light transmission surface on the end of the fibre optical cable connected to the cold light illuminator.
