1 General rules

1.0.1 For the purposes of guaranteeing the fire-fighting security in the interior decoration of buildings, implementing "prevention first, together with fire-fighting" fire prevention guidelines, as well as preventing and minimizing the hazard of building fires, this code is formulated accordingly.

1.0.2 This code is applicable to the interior decoration design for both civil buildings and industrial factory buildings. This code is inapplicable to the interior decoration design for both antique buildings and timber buildings.

1.0.3 Under the principles of safe application, technology-leading and economic feasibility, the interior decoration design of buildings shall deal carefully with the contradictions between decoration effect and application safety, and positively adopt non-combustible material and fire-resistant material, so as to avoid the use of any material that might generate plenty of dense smoke or toxic gas during burning.

1.0.4 The interior decoration design of buildings stated in this code, covers roofing, wall, flooring and partition decoration, as well as fixed furniture, curtain, drapery, bedspread, furniture wrapper and fixed ornaments for the civil buildings, and covers roofing, wall, flooring and partition decorations for industrial factory buildings.

Notes: (1) Partition refers to the partition wall that doesn't touch the roof. The fixed partition wall that touches the roof shall be decorated in the same rules with wall.

(2) The decoration of column surface shall be identical with the provisions of wall surface.

(3) The upper-bracket cabinet that is accompanied with space partition shall be recognized as fixed furniture.

1.0.5 Besides the provisions stated in this code, the interior decoration design of buildings shall be compliant to the relevant national standards and regulations.
