Foreword

Shellac is a kind of natural resin. It is used as sustained-release agent, icing anti-moisture layer, enteric coating, etc. in medicine. It used as candy biofilm, beverage suspending agent, fruit and vegetable fresh-keeping coating agent in food industry. It is necessary to develop industry standards for shellac (Lac) used as food additive to strictly control possible detrimental substances brought during processing and protect consumer's health.

This standard is developed based on GB 4093-83 *Shellac Used as Food Additive*, combining the real situation of shellac production and use in our country.

GB 4093-83 *Shellac Used as Food Additive* will be void since the effective date of this standard.

This standard is under jurisdiction of the National Food Additive Standardization Technical Committee.

The unit responsible for drafting this Standard is: Institute of Chemical Industry of Forest Products, Chinese Academy of Forestry and Jiangsu Provincial Health and Epidemic Prevention Station.

Main drafters of this Standard are: Gan Qigui, Zhou Shunan and Yang Luan.
