Foreword

This Standard was drafted according to the rules specified in GB/T 1.1-2009.

This Standard replaces CJ/T 3074-1998 *Electronic Controller of Household Gas Burning Appliances*.

This Standard is the amendment to CJ/T 3074-1998 *Electronic Controller of Household Gas Burning Appliances*, and the main changes in technical respect compared with CJ/T 3074-1998 are as follows:

- a) Added the controller classification, deleted the content of “model number” (see Chapter 4; Chapter 4 in 1998 version);
- b) Supplemented the controller structure design requirements and circuit structure requirement for internal fault protection (see Chapter 5; 5.3 in 1998 version);
- c) Supplemented the electrical safety and electromagnetic compatibility requirements (see 6.5, 6.6; Chapter 5 in 1998 version);
- d) Modified the requirements for controller function and divided into different modules requirements according to function (see 6.1; 5.1, 5.2 in 1998 version);
- e) Modified the requirements for thermal stress, continuous operating performance and internal fault protection (see 6.2, 6.3, 6.4; 5.1 in 1998 version);
- f) Modified the special requirements for “battery-powered controller” (see Annex H; Chapter 5 in 1998 version);
- g) Deleted the “salt fog test” and “vibration resistance test” (see 5.1 in 1998 version).

In order to maintain consistent with GB 16914-2012 *Technical Condition for Safety of Gas Burning Appliances*, this Standard provides correspondence table in Annex J to show provisions in this Standard that support basic requirements of GB 16914-2012.

This Standard is proposed by Standard Rating Institute of Ministry of Housing and Urban-rural Development.

This Standard is under jurisdiction of Gas Technical Committee for Standardization of the Ministry of Housing and Urban-rural Development.

This Standard is drafted by: Guangdong Vanward New Electric Co., Ltd., North China Municipal Engineering Design & Research Institute, Guangdong Macro Gas Appliance

Electronic controller of household gas burning appliances

1 Scope

This Standard specifies terms and definitions, classification, structure, requirements, test method, inspection rules, designation, installation and operation instructions, packaging, transportation and storage of electric controller (hereinafter referred to as the controller) for household gas burning appliances that uses urban gas specified in GB/T 13611.

This Standard applies to production and inspection of electric controller for household gas burning appliances.

2 Normative references

The articles contained in the following documents have become this standard when they are quoted herein. For the dated documents so quoted, all the modifications (Including all corrections) or revisions made thereafter shall be applicable to this Standard.
