Foreword

The disposable plasmapheresis centrifuge apparatus is composed of plasma separation cup, plasma pipe and hemostix regulated in YY 0328, and is used with the centrifugal automatic plasma collection machine to collect, separate the human plasma and transfuse the blood.

The general title of YY 0326 is the disposable plasmapheresis centrifuge apparatus, which includes the following parts:

Part 1: Plasma separation cup

Part 2: Plasma pipe

Annex A, Annex B, Annex C and Annex D in this standard are the standard annex. Annex E is the informative annex.

This standard is proposed by the State Drug Administration.

This standard is under the jurisdiction of National Standardization Technical Committee of Medical Infusion Apparatus.

The drafting units of this standard: Shanghai Blood Center, Jinan Medical Device Quality Supervision and Inspection Center of State Drug Administration.

Units participating in draft of this standard: Sichuang Nangeer Medical Appliances Co., Ltd., Xi'an Zhengyuan Polymer Products Co., Ltd., Shanghai Xili Medical Co., Ltd.

Main drafters of this standard: Jiang Yueqin, Shi Yanping, Yao Lan, You Shaohua, Zhang Qiang, Pan Lihua, Lu Ansong.

Plasmapheresis centrifuge apparatus for single use-

Part 2: Plasma tubing

1 Scope

This standard regulates the requirements of the component of plasma pipe of the disposable plasmapheresis centrifuge apparatus (hereinafter referred to as the pipe” to ensure that the centrifugal automatic plasma collection machine is suitable to the plasma separation cup and blood collection apparatus.
